FOR IMMEDIATE RELEASE

## WestJet's strong year continues with record traffic statistics for June

Every month in 2007 a record; best first and second quarters in airline's history

**CALGARY, Alberta.** July 5, 2007. WestJet today announced its sixth consecutive month of record load factors for 2007, resulting in a record second quarter and a record first half for the year. June's 79.9 per cent load factor was up 2.8 points compared to 77.1 per cent in June 2006. These results were accompanied by capacity increases of 17 per cent to 1.2 billion ASMs (available seat miles) and increased RPMs (revenue passenger miles) of 21 per cent to 940 million.

Sean Durfy, WestJet President commented, "Our guest satisfaction is higher than ever fuelling our record load factors and significant growth. One of our most powerful marketing tools is guest referrals; almost 90 per cent of guests that fly WestJet recommend us to others and fly with us again.

"Our operational performance remains strong with on-time performance of 86.8 per cent in June. This supports our continuing commitment to high operational standards while attaining record load factors. WestJet's unique corporate culture and strong employee engagement allows us to obtain these operational results while delivering our great guest experience. I thank each of our over 6,500 WestJetters who exemplify our values daily."
